Skills

HTML5 (Slim/Pug preprocessors), CSS3 (Less/SCSS), Web Site Design, Responsive Design practices, Git, jQuery/Javascript, Node,js, CouchDB

Work Experience

Doximity, Remote   July 2018 – Present
Senior HTML Content Producer

- Provided support for CSMs and CSCs by creating new and updated HTML/CSS advertising messages tailored to several of Doximity's prominent accounts across its product line. Additionally, provided technical support and qa for team members and coworkers related to web development.
- Troubleshoot and problem solved code and CSS page layouts (HTML/Ruby Slim)
- Outside my normal role, created multiple chrome extensions to assist with the daily workflows to streamline process for my team and other teams, which included a chrome extension for the Motion Graphics Designers to take a word doc template and strip out the portions they needed to a csv, and then imported that csv into Adobe After Effects, creating compositions for each section.
- Multiple Doximity GSD (getting stuff done) awards

Intel Corporation, Hillsboro, OR   February 2005 – October 2016
Front-End Developer / Content Producer

- Worked for ~12 years supporting every iteration of Intel's Software Developer site (ISN, IDS, IDZ etc) (http://software.intel.com) and all zones including Intel's Internet of Things site.
- Created new site features, styles, updates.
- Created multiple highly visible campaign pages for Intel Developer Forum, SIGGRAPH, Game Developers Conference, Mobile World Conference and more.
- Worked within Drupal to add new features for IDZ.
- Converted Photoshop mockups into standards-compliant HTML and CSS.
- Worked on many different one-off projects or special pages for different groups within Intel.
- Received multiple awards (GDAs, SRAs and a DRA).

Intel Corporation, Hillsboro, OR (contractor)   June 2004 – February 2005
Application Data Entry / Content Producer

- Entered data for Intel's server configuration tool.
- Worked with Intel Developer Servers team creating and publishing content through their NGIP (Interwoven Teamsite) content management tool.

Intel Corporation, Hillsboro, OR (contractor)   February 2004 – May 2004
Content Producer

- One of 3 individuals using the NGIP Localization content management tool for the Intel Developer Services site, in which transitioned an estimated 3300 pieces of content into Russian, German, Traditional and Simplified Chinese.

Intel Corporation, Hillsboro, OR (contractor)   April 2002 - April 2003
Web Designer / Web Developer / Consultant

- Acted as lead developer on multiple projects.
- Developed / maintained web support for multiple Intel intranet websites.
- Designed / implemented / maintained product pages for developer.intel.com
- Migrated & ported two major (over 200 pages each) external company websites.
- Assisted internal teams in redesigning email newsletters and web pages.
- Made changes to XML based menu system.
- Created graphic headers as well as made changes to existing graphics.

Intel Corporation, Hillsboro, OR   (contractor)   September 2000 - September 2001
Web Designer / Web Developer / Consultant

- Developed multiple intranet sites, coding extensive HTML, Designing graphics & layout, and troubleshooting issues with Intel design teams.
- Was one of two main content developers for Intel Developer Services, using the Interwoven Teamsite content management system.
- Head of maintenance on http://www.intel.com/update as well as http://intel.com/technology
- Developed process improvement manual which contained guidelines for managing the workflow of content updates for Intel websites.
- Converted Word & PSD to HTML for posting to web sites.

Techs Equipment, Scappoose, OR   August 1999 - September 2000
Senior Web Designer / Tech

- Designed and updated international reaching website.
- Managed photo-shoots for customers.
